‘Perspectives in Child Development: An introduction into the ideas of Emotional Development in Children according to John Bowlby’

ONE-DAY WORKSHOP

Attachment and Mental Health - The Emotional Development of Children.

The day will start with an overview of attachment theory from a personal perspective and then examine the significance of attachment to the “mother figure” as well as attachment to other figures in children’s lives including care of babies and toddlers by non-parental figures. There will be ample opportunity for questions and discussion throughout the presentation so that content can be guided by the wider/individual interests of the delegates.

SPEAKERS:

Sir Richard Bowlby

Maeja Raicar, Psychoanalytic Psychotherapist, Parent Infant Psychotherapist, NLP
