From The Legacy of the Rene Spitz Film Archives

Baby Brains (17 and 18 July 1998) £30

Psychological Development of the Infant and Implications for Therapy Practice

17 (evening) and 18 July 1998 The Tavistock Clinic London.

Allan Shore

Assistant Clinical Professor of Psychiatry and Bio-behavioural sciences at the UCLA Medical School.

Author of Affect regulation and the origin of the self.

Affect Regulation: A Fundamental Process of Psychobiological Development, Brain Organisation and Psychotherapy.

Dr Shore speaks on the ways in which neurobiological interactions between the parent and baby are reproduced in psychotherapy.

Colwyn Trevarthen

Professor Emeritus of Child Psychology and psychobiology at the University of Edinburgh.

Passionate Observers and Imitators: Joys and deceptions of Companionship with Infants.

With slides, video, and overheads, Dr Trevarthen discusses how the study of infants reveals mental pathology to be a sickness of the self who has lost company and understanding.

Anne Alvarez

Consultant Child Psychotherapist and Co-convenor of the Autism Service of the Child and Family Department at the Tavistock Clinic, London.

Early Developmental Considerations in the Psychoanalytic Treatment of Autism.

Infant observation illuminates vital precursors of development, enabling carers of autistic children to attune to early development.

Stella Acquarone

Child and Adolescents Psychotherapist and founder of the Parent Infant Centre, London.

How early can we intervene?

Using Examples from her clinical practice, Dr Acquarone demonstrates how brief psychodynamic interventions can resolve distress in the family with a new baby, and how to intervene early.

Brett Kahr

Senior Lecturer in Psychotherapy at Regents College, London and Course Tutor in the Child and Family Department at the Tavistock Clinic, London.

Conference Chair.
